

# KSC Energy Conservation Program

## Launch Control Center (LCC) Energy Consumption

- The LCC costs Americans **\$3000 per day** in electricity costs, and consumption is on the rise in this facility!
- Federal Mandates require KSC to reduce energy consumption and your Facility Manager needs your help.
- Contact your Facility Manager, Harold Davis (861-2570) if you have energy conservation suggestions.
- Turning off your personal computer, copiers, printers, desk lights, office lighting and fax machines when you go home really add up to savings!
- Your Energy Managers are Ed Brennan (861-4469), Jim Fletcher (264-8432), and Chris Iannello (861-3276).
- You can log on to <http://environmental.ksc.nasa.gov/> for energy tips.
