

# KSC Energy Conservation Program

## Process Control Center (PCC) Energy Consumption

- The PCC costs Americans over \$960 per day in electricity costs.
- Federal Mandates require KSC to reduce energy consumption and your Facility Manager needs your help.
- Contact your Facility Manager, Debbie McMullen (861-4937) if you have energy conservation suggestions.
- Turning off your personal computer, copiers, printers, desk lights, office lighting and fax machines when you go home really add up to savings!
- Your Energy Managers are Ed Brennan (861-4469), Jim Fletcher (264-8432), and Chris Iannello (861-3276).
- You can log on to <http://environmental.ksc.nasa.gov/> for energy tips.
