Ozone Depleting Substances Main Menu

The required report information pertains to those substances determined to have a detrimental effect on the earth's ozone layer. Included is information on purchase, usage and storage of these substances.

Ozone Depleting Substances Usage is tracked on a calendar year basis.

ODS screen Help is available for the following topics:

Ozone Depleting Substances

Annual ODS

Ozone Depleting Substances

A compound that contributes to stratospheric ozone depletion. Ozone Depleting Substances include CFCs, HCFCs, halons, methyl bromide, carbon tetrachloride, and methyl chloroform.

Reporting Year

ODS Name and CAS Number

Stored Quantity (lbs)

ODS Name and CAS Number

Select the appropriate substance name and CAS Number from the drop-down list.

If the substance is not on the list, contact the NETS Help Line at (216) 433-2300 to have it added. Please provide the Substance Name and CAS Number.

Stored Quantity (lbs)

This is the maximum measured amount of ozone depleting substance that is routinely or typically stored at your site. Enter the amount of substance in POUNDS.

Purchased Quantity (lbs)

Quantity of ozone depleting substance procured for the Center.

Enter the amount of substance in POUNDS.

Usage Quantity (lbs)

The amount of ozone depleting substance used by the reporting site within the specified report period. This system generated field is expressed in POUNDS.

ODS Uses

Check the appropriate application(s) in which the Substance was utilized.

Check all that apply.

Annual ODS

Amount of ODS used by the Center during the reporting year.

Reporting Year

Annual ODS Progress Description

Annual ODS Success Description

Annual ODS Reduction Challenge Description

Date/Site/User

Annual ODS Progress Description

Explain in detail actions taken at the Center to reduce or eliminate the use of Ozone Depleting Substances during the reporting year.

Annual ODS Success Description

Describe successful measures taken to reduce or eliminate the use of Ozone Depleting Substances during the reporting year.

Annual ODS Reduction Challenge Description

Explain the challenges faced by the Center when trying to reduce or eliminate the use of Ozone Depleting Substances during the reporting year.
